

CONSTRUCTION EQUIPMENT

EXCAVATORS

MODEL NO.

200C LC 230C LC 270C LC

- > 20- to 27-metric ton
- > 141 to 177 horsepower
- > 19-ft. 7-in. to 23-ft. 9-in. digging depth with standard arm

20-27 Metric Ton

Reach for the stars...at ground level, the 200C LC has a 32-foot reach; the 230C LC has a 34-foot, 10-inch reach; and the 270C LC has a 36-foot, 6-inch reach.

TRIPLE PLAY

You may feel like you're at play instead of at work when you climb into the cab of one of our new excavators. Whether you choose the 200C LC, the 230C LC, or the 270C LC, you're sure to feel the power, precision, and practicality we've packed into these 20–27-metric-ton machines. It's all there: beefy Deere PowerTech™ engines that meet the Environmental Protection Agency's "Tier II" emissions regulations without bashing your fuel budget; pinpoint metering and control for your tightest tasks thanks to the Powerwize II® engine/hydraulic management system; a sumptuous operator's station with more visibility and ventilation; and serviceability features that make routine maintenance a stroll in the park.

You'll find it so easy to be comfortable and productive in these excavators that by the end of the day you might well hear someone calling you away from "play" — just like Mom used to. But the first call has to be yours. Contact your dealer today and demo the model with the right reach, horsepower, and lift capacity for you.

What's your game? These new excavators from Deere are sized and powered to do just about everything. Trenching? Site development? Dig basements? Bury underground utilities? Aboveground applications? Knock yourself out.

With Deere's PowerTech engine and efficient, gutsy hydraulics, these excavators dig deep and come up asking for more. The 20-metric-ton 200C LC boasts a maximum digging depth of 21 feet, 11 inches. The 230C LC digs down to 24 feet, 6 inches, while the 270C LC maxes at 25 feet, 11 inches.

The Deere PowerTech 6.8-L, 414-cubic-inch engine is turbocharged, air-cooled, and designed to give you thousands of hours of efficient power.

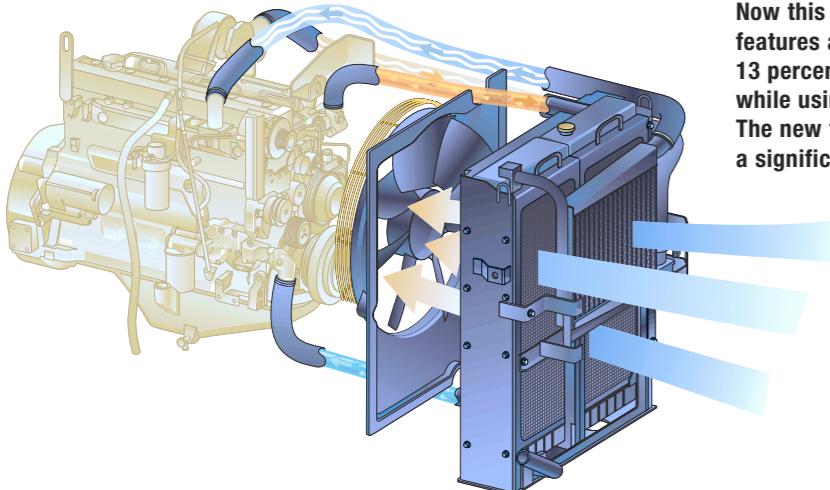

These "Cs" are easy to transport — usually without permits — which means your customers won't have to play a "waiting game." Just load and go!

CONSTRUCTION EQUIPMENT		EXCAVATORS
	SUBJECT:	PERFORMANCE
ARM OPTIONS:		
200C LC	7 foot 3 inch (2.22 m)	9 foot 7 inch (2.91 m)
230C LC	9 foot 9 inch (2.96 m)	11 foot 10 inch (3.61 m)
270C LC	10 foot 2 inch (3.10 m)	12 foot 4 inch (3.75 m)

SUBJECT:

ENGINE & SYSTEMS

The cooling system's radiator is completely welded from the tube to the header joint, with a "square-wave" fin design to increase heat transfer by 18 percent.

Deere PowerTech engines retain all the features you've come to expect from Deere, and more. Our wet-sleeve, individually replaceable cylinder liners are admired throughout the industry for their ability to eliminate hot spots.

Precision digging or laying pipe in just the right place shouldn't be taxing. It should be smooth and easy. Jerky controls, uneven bursts of power, or fatigue won't be parts of your workday due to Deere's exclusive Powerwize II engine/hydraulic management system.

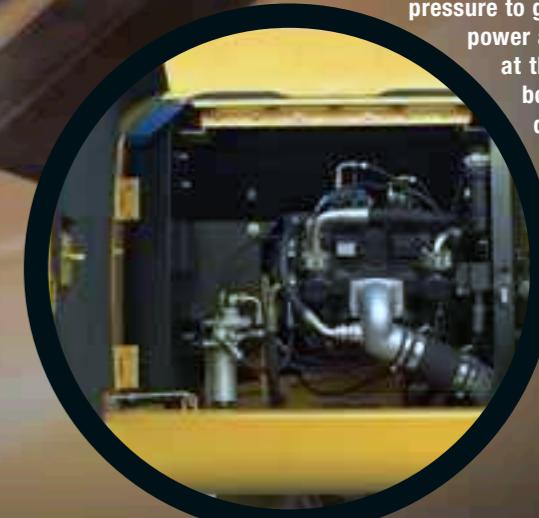

Powerwize technology lets the excavator arm be your "bionic" arm — an extension of your own, only with a lot more muscle. It lets operators do precise work with a minimum of effort — 10 percent less lever effort to be exact. There's only one hydraulic mode, so just select the desired engine mode, adjust the engine speed knob, and "go."

Now this is cool: Deere's cooling system features a new airfoil fan that gives you 13 percent more cooling performance while using 4 percent less horsepower. The new fan also lowers noise level by a significant 4 d(B)a.

Each Deere engine has an Electronic Control Unit (ECU) that serves as an electronic "brain." By regulating the fuel-injection process, the ECU ensures smooth, safe effort without wasting fuel. It also acts like a safety net by decreasing engine power and speed automatically if key readings like fuel pressure or temperature drift into the red zone.

We've increased hydraulic flow and pressure to give you more power and precision at the end of the boom. The new design is very "attachment friendly."

SUBJECT:

OPERATOR STATION

Windows to your world

Let the sunshine in — and the fresh air flow freely — with the tinted sunroof hatch.

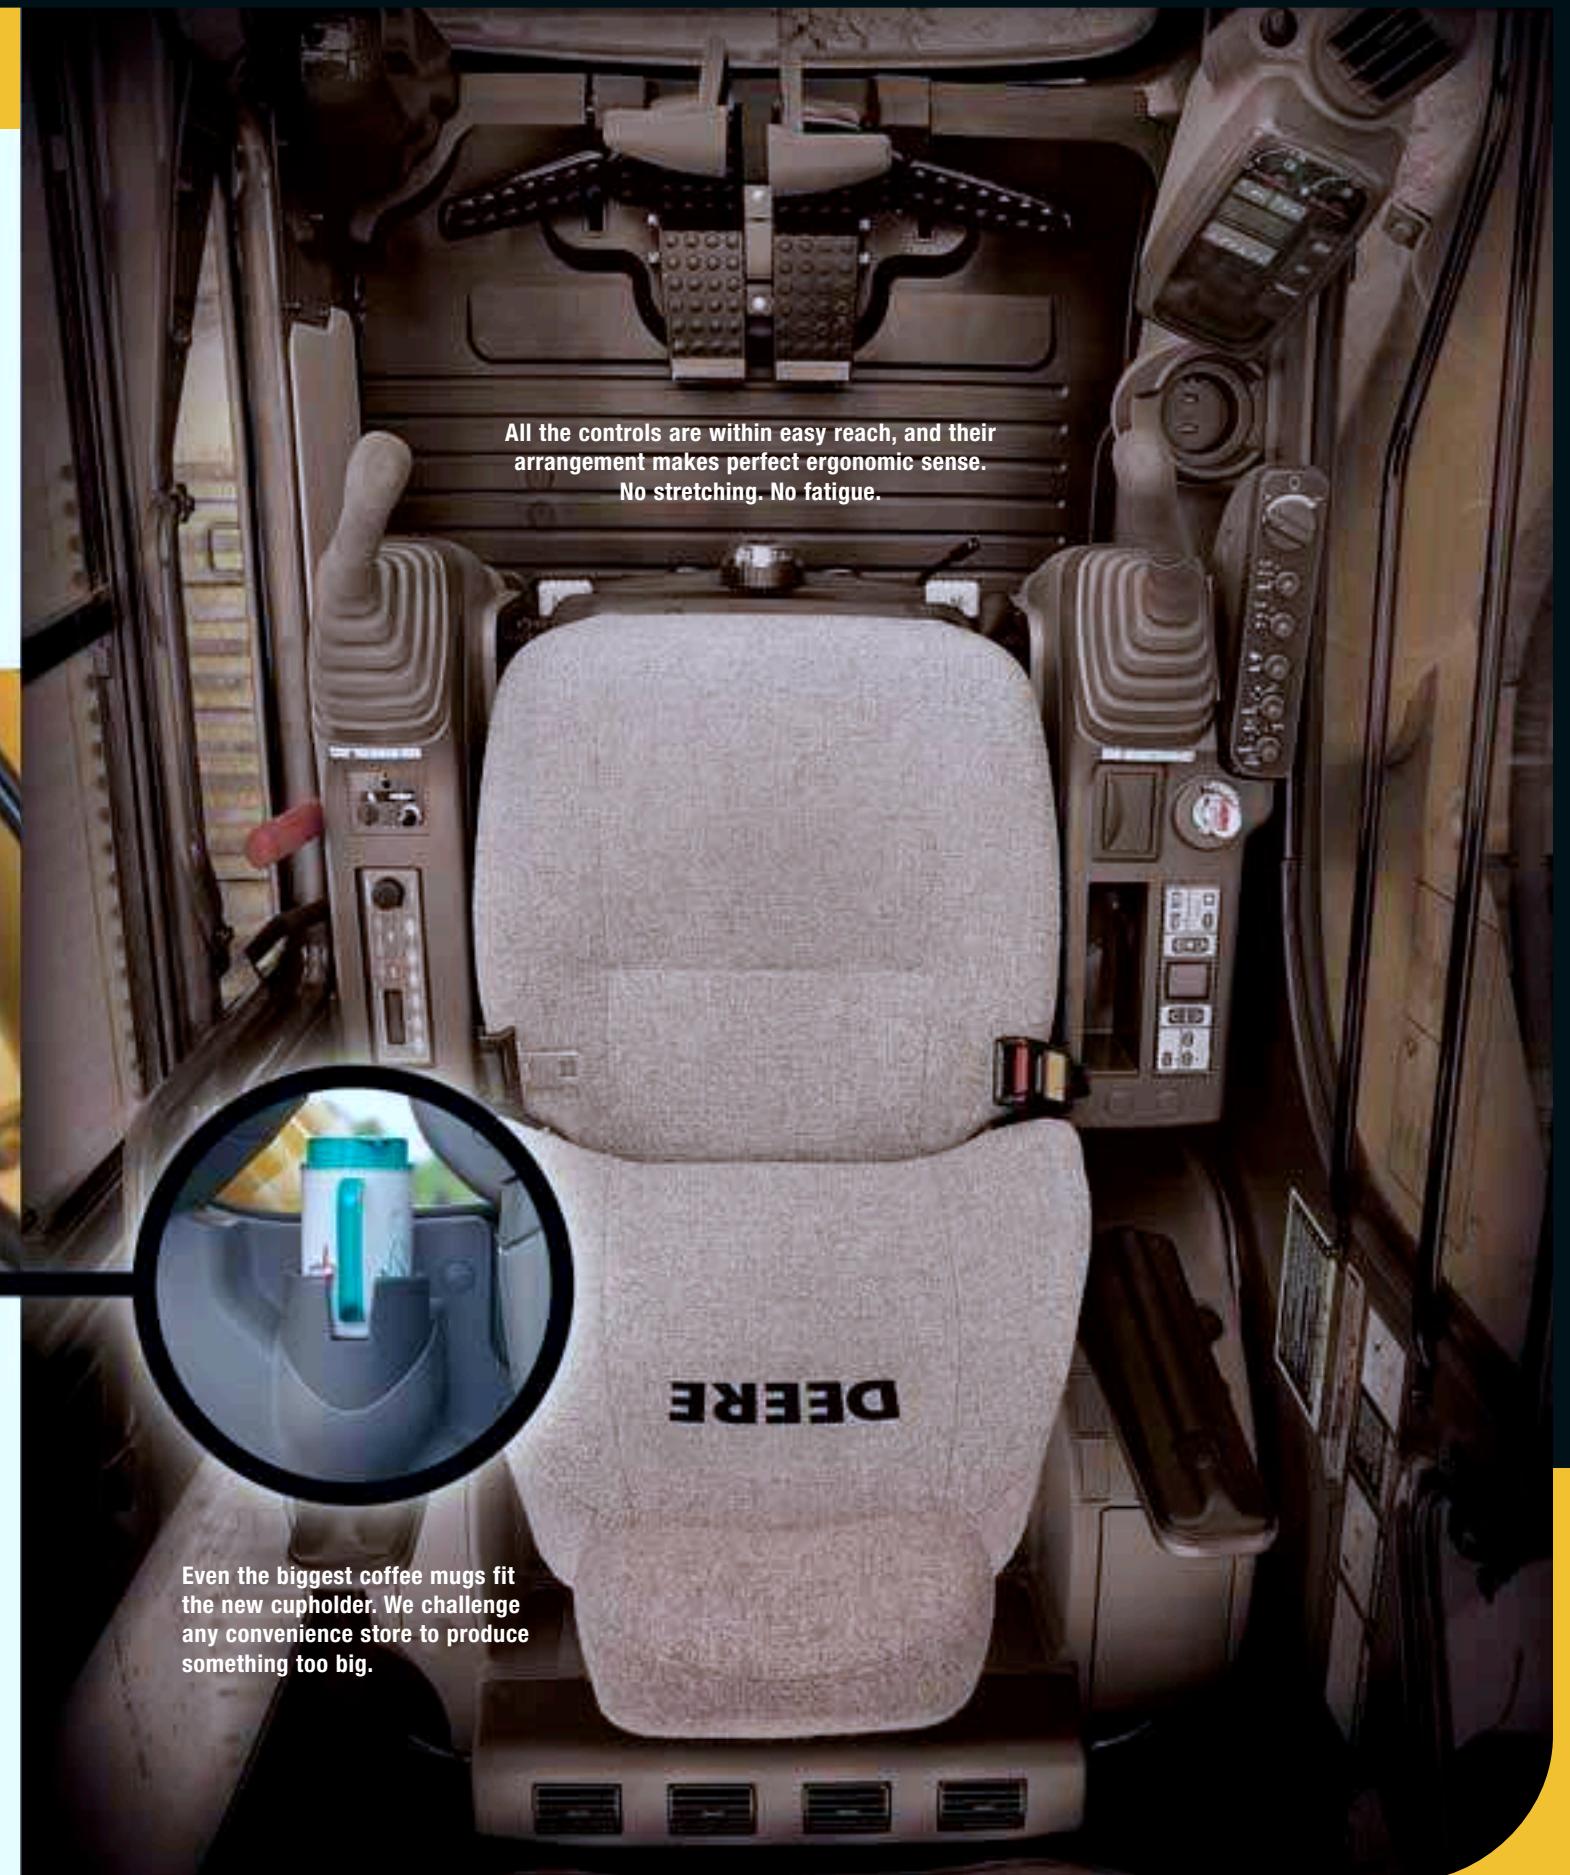

The windshield wiper cleans 25 percent more glass for an even clearer look. Then it disappears from view.

Adjustable vents are everywhere. You'll never have trouble setting and maintaining a comfortable temperature. All shift, all week.

Seeing is indeed believing. Sit in the cab and take a good look around. Deere's designed an operator's station with the ultimate view. There's 28 percent more glass to look through, so you can see every angle of the task at hand. Or at arm. Or at bucket. You get the picture.

And because your world can consist of tough 12-hour-days, we've made the cab a pleasant and comfortable place to work. The new seat features adjustable lumbar support like you'd expect to find in a best-in-class luxury car, and a "blend-air" automatic climate-control system keeps the temperature just right. You might even start feeling a little self-indulgent when you see the built-in beverage cooler, the "big-gulp" cupholder, and the 12-volt cellular phone jack. So, go ahead and live a little. Why should work always have to feel like work?

Even the biggest coffee mugs fit the new cupholder. We challenge any convenience store to produce something too big.

Get to the point(s)!

John Deere's Customer Personal Service (CPS) features a line-up of programs and tools that can be customized to fit your business. Whether it's maintenance programs, extended warranties, or parts availability programs, CPS is a one-on-one service that can bring uptime to an all-new level. Talk to your dealer about CPS today.

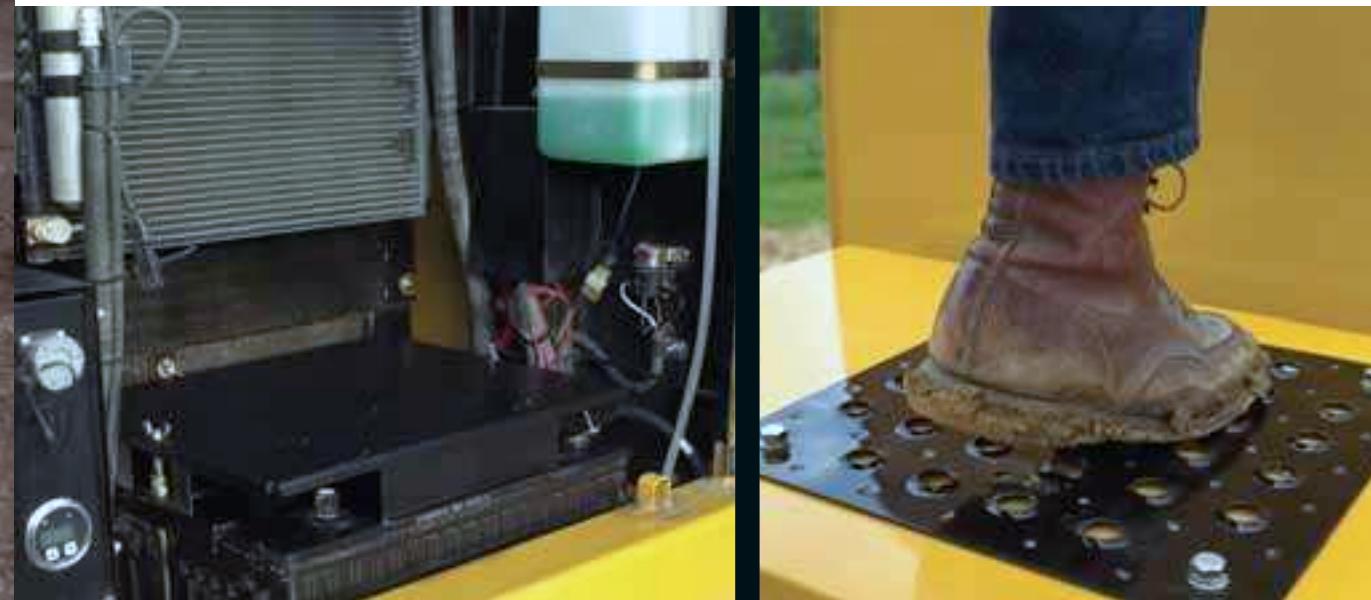

We stand behind these new excavators. Want proof? Check out our StructurAll™ warranty. It adds three years of coverage on major structures as installed at the time your excavator is manufactured. It's free of charge, for unlimited hours, on important stuff like booms, arms, and mainframes.

The first hydraulic filter-change interval is not until 4,000 hours, then every 2,000 hours after that. That's time and money better spent elsewhere.

Servicing the cooling system is a snap. The cooling cores feature wide-fin spacing so that trash will pass through the system without clogging it, reducing cleaning time.

We don't think there's ever been a job site where there's never mud, rain, or snow. That's why we strategically fastened bolt-on skid plates where you step or stand during routine service.

Routine service is a lot like those childhood commands you used to get from Mom — "Wash up before dinner," or "Put on that jacket before you go out!" You know it's necessary, but it can delay the fun. That's why we made daily service quick and easy.

Look what's behind those big, easy-to-open service doors. Checking filters and fluid levels has never been faster. We've even extended some routine service intervals, such as the engine oil-change interval. It's been doubled from 250 to 500 hours. We simply want you to get to the job you love. (Mom would be so proud!)

200C LC Lift Capacities

Boldface italic type indicates hydraulic-limited capacities; lightface type indicates stability-limited capacities, in lb. (kg). Ratings at bucket lift hook; machine equipped with 1.12-cu. yd. (0.86 m³), 42-in. (1065 mm) wide, 1,590-lb. (723 kg) bucket; and situated on firm, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine. All lift capacities are with power boost and are based on SAE J1097.

Load Point	10 ft. (3.05 m)		15 ft. (4.57 m)		20 ft. (6.10 m)		25 ft. (7.62 m)		30 ft. (9.15 m)	
Height	Over Front	Over Side	Over Front	Over Side	Over Front	Over Side	Over Front	Over Side	Over Front	Over Side

230C LC Lift Capacities

Boldface italic type indicates hydraulic-limited capacities; lightface type indicates stability-limited capacities, in lb. (kg). Ratings at bucket lift hook; machine equipped with 1.38-cu. yd. (1.06 m³), 42-in. (1065 mm) wide, 1,785-lb. (810 kg) bucket; and situated on firm, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine. All lift capacities are with power boost and are based on SAE J1097.

Load Point	10 ft. (3.05 m)		15 ft. (4.57 m)		20 ft. (6.10 m)		25 ft. (7.62 m)		30 ft. (9.15 m)	
Height	Over									

270C LC Lift Capacities

Boldface italic type indicates hydraulic-limited capacities; lightface type indicates stability-limited capacities, in lb. (kg). Ratings at bucket lift hook; machine equipped with 1.75-cu. yd. (1.34 m³), 42-in. (1065 mm) wide, 1,966-lb. (892 kg) bucket; and situated on firm, uniform supporting surface. Total load includes weight of cables, hook, etc. Figures do not exceed 87 percent of hydraulic capacities or 75 percent of weight needed to tip machine. All lift capacities are with power boost and are based on SAE J1097.

200C LC Buckets

A full line of buckets is offered to meet a wide variety of applications. Digging forces are with power boost. The buckets have an adjustable bushing for side clearance, with the exception of the ditching bucket. Tooth selection includes either the John Deere Fanggs®, Standard, Tiger, Twin Tiger, Abrasion panel, or Flare tooth, or the ESCO (Vertalok) Standard, Tiger, Twin Tiger, or Flare tooth. Replaceable cutting edges are available through John Deere parts. Optional side cutters add 6 inches (150 mm) to bucket widths.

200C LC Bucket Selection Guide

Material (loose weight)	Recommended Bucket Size	
	General-Purpose Bucket*	Heavy-Duty Bucket*
Wood chips – 700 lb./cu. yd. (420 kg/m³)	6.50 cu. yd. (5.0 m³)	—
Peat, dry – 750 lb./cu. yd. (440 kg/m³)	5.50 cu. yd. (4.2 m³)	—
Cinders – 950 lb./cu. yd. (560 kg/m³)	4.00 cu. yd. (3.1 m³)	—
Peat, wet – 1,170 lb./cu. yd. (690 kg/m³)	3.50 cu. yd. (2.7 m³)	—
Topsoil – 1,600 lb./cu. yd. (950 kg/m³)	2.50 cu. yd. (1.9 m³)	—
Coal – 1,780 lb./cu. yd. (1050 kg/m³)	2.25 cu. yd. (1.7 m³)	—
Caliche – 2,100 lb./cu. yd. (1250 kg/m³)	1.38 to 1.75 cu. yd. (1.1 to 1.3 m³)	1.25 to 1.50 cu. yd. (1.0 to 1.2 m³)
Earth, loam – 2,100 lb./cu. yd. (1250 kg/m³)	1.75 cu. yd. (1.3 m³)	1.50 cu. yd. (1.2 m³)
Shale – 2,250 lb./cu. yd. (1330 kg/m³)	1.75 cu. yd. (1.3 m³)	1.50 cu. yd. (1.2 m³)
Sand, dry – 2,400 lb./cu. yd. (1420 kg/m³)	1.75 cu. yd. (1.3 m³)	1.50 cu. yd. (1.2 m³)
Clay, dry – 2,500 lb./cu. yd. (1480 kg/m³)	1.12 to 1.50 cu. yd. (0.9 to 1.1 m³)	1.38 cu. yd. (1.1 m³)
Earth, dry – 2,550 lb./cu. yd. (1510 kg/m³)	1.38 to 1.50 cu. yd. (1.1 to 1.2 m³)	1.38 cu. yd. (1.1 m³)
Limestone, broken or crushed – 2,600 lb./cu. yd. (1540 kg/m³)	1.12 to 1.50 cu. yd. (0.9 to 1.2 m³)	1.00 to 1.38 cu. yd. (0.8 to 1.1 m³)
Earth, wet – 2,700 lb./cu. yd. (1600 kg/m³)	1.50 cu. yd. (1.2 m³)	1.38 cu. yd. (1.1 m³)
Clay, wet – 2,800 lb./cu. yd. (1660 kg/m³)	1.50 cu. yd. (1.2 m³)	1.38 cu. yd. (1.1 m³)
Rock, granite, blasted and broken – 2,800 lb./cu. yd. (1660 kg/m³)	1.38 to 1.75 cu. yd. (1.1 to 1.3 m³)	1.25 to 1.50 cu. yd. (1.0 to 1.2 m³)
Sand, moist – 2,850 lb./cu. yd. (1690 kg/m³)	1.50 cu. yd. (1.2 m³)	1.38 cu. yd. (1.1 m³)
Sand and gravel, dry – 2,900 lb./cu. yd. (1720 kg/m³)	1.50 cu. yd. (1.2 m³)	1.38 cu. yd. (1.1 m³)
Sand, wet – 3,100 lb./cu. yd. (1840 kg/m³)	1.38 cu. yd. (1.1 m³)	1.25 cu. yd. (1.0 m³)
Sand and gravel, wet – 3,400 lb./cu. yd. (2020 kg/m³)	1.38 cu. yd. (1.1 m³)	1.25 cu. yd. (1.0 m³)

*Contact your John Deere dealer for optimum bucket and attachment selections. These recommendations are for general conditions and average use. Larger buckets may be possible when using light buckets, for flat and level operations, less compacted materials, and volume loading applications such as mass excavation applications in ideal conditions. Smaller buckets are recommended for adverse conditions such as off-level applications and uneven surfaces. Bucket capacity indicated is SAE heaped.

230C LC Bucket Selection Guide

Material (loose weight)	Recommended Bucket Size	
	General-Purpose Bucket*	Heavy-Duty Bucket*
Wood chips – 700 lb./cu. yd. (420 kg/m³)	7.0 cu. yd. (5.4 m³)	—
Peat, dry – 750 lb./cu. yd. (440 kg/m³)	6.0 cu. yd. (4.6 m³)	—
Cinders – 950 lb./cu. yd. (560 kg/m³)	4.25 cu. yd. (3.2 m³)	—
Peat, wet – 1,170 lb./cu. yd. (690 kg/m³)	3.75 cu. yd. (2.9 m³)	—
Topsoil – 1,600 lb./cu. yd. (950 kg/m³)	2.5 cu. yd. (1.9 m³)	—
Coal – 1,780 lb./cu. yd. (1050 kg/m³)	2.5 cu. yd. (1.9 m³)	—
Caliche – 2,100 lb./cu. yd. (1250 kg/m³)	1.25–1.75 cu. yd. (1.0–1.3 m³)	1.13–1.50 cu. yd. (0.9–1.2 m³)
Earth, loam – 2,100 lb./cu. yd. (1250 kg/m³)	1.75 cu. yd. (1.3 m³)	1.50 cu. yd. (1.2 m³)
Shale – 2,250 lb./cu. yd. (1330 kg/m³)	1.75 cu. yd. (1.3 m³)	1.50 cu. yd. (1.2 m³)

200C LC / 230C LC / 270C LC Excavators

Key: ● Standard equipment ▲ Optional or special equipment

200 230 270 Engine

- ● ● Meets EPA Tier II non-road emissions regulations
- ● ● Auto-idle system
- ● ● Automatic belt tension device
- ● ● Batteries (two 12 volt), 180-min. reserve capacity
- ● ● Coolant recovery tank
- ● ● Dual element dry-type air filter
- ● ● Electronic engine control with diagnostics capability
- ● ● Enclosed fan guard (conforms to SAE J1308)
- ● ● Engine coolant to -34°F (-37°C)
- ● ● Fuel filter with water separator
- ● ● Full-flow oil filter
- ● ● Radiator trash screen
- ● ● Tier II EPA off-road emission compliant
- ● ● Turbocharger with charge air cooler
- ● ● Underhood muffler with vertical curved end exhaust stack
- ▲▲▲ Electric ether starting aid
- ▲▲▲ Engine coolant heater

Hydraulic System

- ● ● Reduced-drift valve for boom down, arm in
- ● ● Auxiliary hydraulic valve section
- ● ● Spring-applied, hydraulically released automatic swing brake
- ▲▲▲ Auxiliary hydraulic lines
- ▲▲▲ Auxiliary pilot and electric controls
- ▲▲▲ Hydraulic filter restriction indicator kit
- ▲▲▲ Load-lowering control device
- ▲▲▲ Single pedal propel control

Undercarriage

- ● ● Planetary drive with axial piston motors
- ● ● Propel motor shields
- ● ● Track guides, front idler and center
- ● ● Triple semi-grouser shoes, 32 in. (800 mm)
- ▲▲▲ Triple semi-grouser shoes, 24 in. (600 mm)
- ▲▲▲ Triple semi-grouser shoes, 28 in. (700 mm)
- ● ● Two-speed propel with automatic shift
- ● ● Upper carrier rollers (2)

Upperstructure

- ● ● Right- and left-hand mirrors
- ● ● Vandal locks with ignition key: Cab door / Fuel cap / Service doors

200 230 270 Front Attachments

- ● ● Bucket-to-arm clearance adjustable bushing (except ditching buckets)
- ● ● Centralized lubrication system
- ● ● Dirt seals on all bucket pins
- ● ● No-boom-arm option
 - ▲ Arm, 7 ft. 3 in. (2.22 m)
 - ▲ Arm, 9 ft. 7 in. (2.91 m)
 - ▲ Arm, 9 ft. 9 in. (2.96 m)
 - ▲ Arm, 10 ft. 2 in. (3.10 m)
 - ▲ Arm, 11 ft. 10 in. (3.61 m)
 - ▲ Arm, 12 ft. 4 in. (3.75 m)
- ▲▲▲ Attachment quick couplers
- ▲▲▲ Boom cylinder with plumbing to main-frame for no-boom-arm option
- ▲▲▲ Buckets: Ditching / General purpose / General-purpose high capacity / Heavy duty / Heavy-duty high capacity / Severe-duty cast lip / Severe-duty plate lip / Side cutters and teeth
- ▲▲▲ Material clamps
- ▲▲▲ Super-long fronts

Operator's Station

- ● ● Adjustable independent control positions (levers-to-seat, seat-to-pedals)
- ● ● AM/FM radio
- ● ● Auto climate control/air conditioner, 20,000 Btu/hr. (5.9 kW) with heater and pressurizer
- ● ● Built-in Operator's Manual storage compartment and manual
- ● ● Cell-phone power outlet, 12 volt, 60 watt, 5 amp
- ● ● Coat hook
- ● ● Deluxe suspension cloth seat with 4-in. (100 mm) adjustable armrests
- ● ● Floor mat
- ● ● Front windshield wiper with intermittent speeds
- ● ● Gauges (illuminated): Engine coolant / Fuel
- ● ● Horn, electric
- ● ● Hourmeter, electric
- ● ● Hydraulic shutoff lever, all controls
- ● ● Hydraulic warm-up control
- ● ● Interior light
- ● ● Large cup holder

*See your John Deere dealer for further information.

200 230 270 Operator's Station (continued)

- ● ● Machine Information Center (MIC)
- ● ● Mode selectors (illuminated): Power modes – three / Travel modes – two with automatic shift / Work mode – one
- ● ● Monitor system with alarm features: Auto-idle/auto-acceleration indicator light / Engine air cleaner restriction indicator light / Engine check / Engine coolant temperature indicator light with audible alarm / Engine oil pressure indicator light with audible alarm / Fluid level: Engine coolant level indicator light, engine oil level indicator light, and hydraulic oil level indicator light / Low alternator charge indicator light / Low fuel indicator light / Wiper mode indicator / Work lights on indicator / Work mode indicator
- ▲▲▲ Monitor system with alarm features: Hydraulic oil filter restriction indicator light
- ● ● Motion alarm with cancel switch (conforms to SAE J994)
- ● ● Power boost switch on right control lever
- ● ● Propel pedals and levers
- ● ● SAE two-lever control pattern
- ● ● Seat belt, 2 in. (51 mm), retractable
- ▲▲▲ Seat belt, 3 in. (76 mm), non-retractable
- ● ● Tinted glass
- ● ● Transparent tinted overhead hatch
- ▲▲▲ 24- to 12-volt D.C. radio convertors, 10 amp
- ▲▲▲ Alternate pilot control pattern
- ▲▲▲ Circulation fan
- ▲▲▲ Protection screens for cab front, rear, and side
- ▲▲▲ Window vandal protection covers
- ● ● Electrical
 - ● ● 45-amp alternator
 - ● ● Blade-type multi-fused circuits
 - ● ● Positive terminal battery covers
 - ▲▲▲ Cab extension wiring harness
- ● ● Lights
 - ● ● Work lights: Halogen / One mounted on boom / One mounted on frame

Control Owning and Operating Costs

Total Repair Cost Management (TRCM) is part of John Deere's proactive, fix-before-fail strategy on machine maintenance that will help control costs, increase profits, and reduce stress. Included in this comprehensive lineup of ongoing programs and services are:

OilScan® Plus program – tells you what's going on inside *all* of your machine's major components so you'll know if there's a problem *before* you see a decline in performance. OilScan Plus oil analysis is included in most SECURE®-Extended warranty and preventive-maintenance agreements.

Component life-cycle data – gives you vital information on the projected life span of components and lets you make informed decisions on machine maintenance by telling you approximately how many hours of use you can expect from an engine, transmission, or hydraulic pump. This information can be used to preempt catastrophic downtime by servicing major components at about 80 percent of their life cycle.

Preventive Maintenance (PM) agreements – give you a fixed cost for maintaining a machine for a given period of time. They also help you avoid downtime by ensuring that critical maintenance

work gets done right and on schedule. On-site preventive maintenance service performed where and when you need it helps protect you from the expense of catastrophic failures and lets you avoid waste-disposal hassles.

SECURE-Extended warranty – gives you a fixed cost for machine repairs for a given period of time so you can effectively manage costs. Whether you work in a severe-service setting or just want to spread the risk of doing business, this is a great way to custom-fit coverage for your operation. And a SECURE-Extended contract also travels well because it's backed by John Deere and is honored by all Deere construction dealers.

Customer Support Advisors (CSAs) – Deere believes the CSA program lends a *personal* quality to Total Repair Cost Management. Certified CSAs have the knowledge and skills for helping make important decisions on machine maintenance and repair. Their mission is to help you implement a plan that's right for *your* business and take the burden of machine maintenance off your shoulders.

JOHN DEERE

Net engine power is with standard equipment including air cleaner, exhaust system, alternator, and cooling fan, at standard conditions per SAE J1349 and DIN 6270B, using No. 2-D fuel at 35 API gravity. No derating is required up to 10,000-ft. (3050 m) altitude. Gross power is without cooling fan.

Specifications and design subject to change without notice. Wherever applicable, specifications are in accordance with PCSA and SAE standards. Except where otherwise noted, these specifications are based on units with 32-in. (800 mm) triple semi-grouser shoes; full fuel tanks; and 175-lb. (79 kg) operators; 2000 LC unit with 9-ft. 7-in. (2.91 m) arm, 42-in. (1065 mm) 1.12-cu. yd. (0.86 m³) bucket, and 10,270-lb. (4658 kg) counterweight; 230C LC unit with 11-ft. 10 in. (3.61 m) arm, 42-in. (1065 mm) 1.38-cu. yd. (1.06 m³) bucket, and 11,265-lb. (5110 kg) counterweight; and 270C LC unit with 12-ft. 4-in. (3.75 m) arm, 42-in. (1065 mm) 1.75-cu. yd. (1.34 m³) bucket, and 13,468-lb. (6109 kg) counterweight.
