

110zII

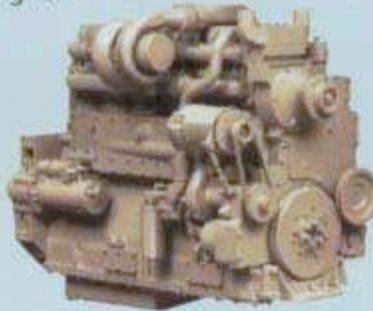

110zII

SUMMARY OF FEATURES

- The reliable, fuel efficient Cummins KT-19-C turbocharged engine supplies a big 383 HP.
- Z-type linkage for high breakout force and easy digging in tough materials.
- Dual bucket cylinders for excellent visibility to the bucket plus distribution of loads evenly across the torque tube.
- Caliper disc brakes are self-cleaning, fade resistant and easy to change, for the lowest cost per hour.
- High tipping loads for excellent stability.
- Large 35/65 x 33 tire provides excellent flotation and high load capacity.
- Safety features include separate brake systems front and rear, emergency brake, major component monitor system, reverse alarm, neutral start and optional emergency-steering.
- Operator features include adjustable steering column, single twist grip transmission lever, fingertip hydraulic controls, isolated/sound suppressed cab, suspension seat, bucket leveler and boom kickout.
- Service features include sealed linkage pins, remote mounted grease fittings, tire inflation kit, SAE hydraulic hoses, multiple use of common hoses, hinged hood/sides and special tool kit.

CUMMINS ENGINE

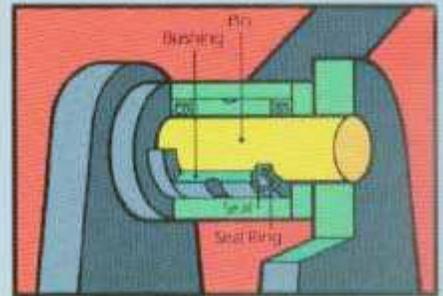

The state-of-the-art Cummins KT-19-C turbocharged diesel provides a big 383 flywheel horsepower. With outstanding torque characteristics; this engine also offers excellent fuel economy. The turbo-charger permits efficient operation at high altitude or high ambient conditions. Reliable Delco Remy electrical components make service easy. Ether cold start is standard. Resilient engine mounts reduce vibration and noise. Two stage Donaldson air cleaner protects the engine.

OPERATOR COMFORT FEATURES

The roomy ROPS cab is rubber mounted to reduce vibration and sound levels. The cab is well appointed with tinted glass, sliding windows, front and rear wipers and washer, defroster fan, side mirrors and interior rear view mirrors. Operator comfort is further enhanced with the three-way adjustable, suspension seat and adjustable steering column. Bucket visibility is excellent because of the dual bucket cylinder design.

SEALED DUAL Z-LINKAGE

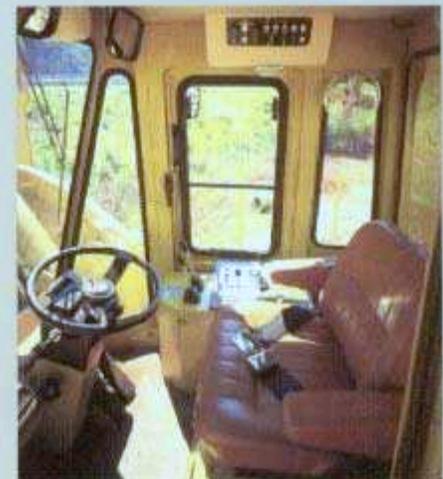

The Z-type bucket linkage provides high breakout force and digging power for the toughest jobs. Also, the bucket roll-back angle permits carrying the maximum load without spillage. The linkage pins are sealed to retain lubricant better. The two cylinder design spreads loads evenly along the torque tube to increase reliability.

SOFT-SHIFT TRANSMISSION

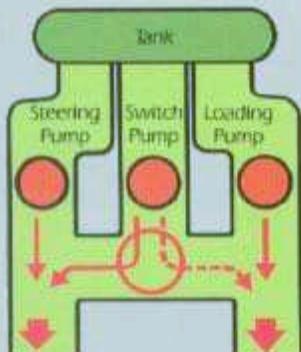

The tough planetary, 3-speed powershift transmission has a soft shift feature to reduce shift shock and increase operator comfort. The single twist grip lever is convenient for quicker cycles and less operator fatigue.

SMOOTH, EASY STEERING AND FINGERTIP CONTROL

The demand hydraulic system assures smooth easy steering at any engine speed. The switch pump supplements the steering pump at low RPM and the loading pump at higher RPM.

Also the hoist and bucket control levers are servo assisted to reduce lever effort. This fingertip control, coupled with the standard bucket leveler and boom kick-out, speeds cycle times and provides positive control, while reducing operator fatigue. All of this adds up to greater productivity.

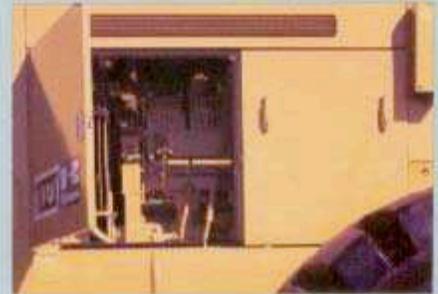

FAST HYDRAULICS

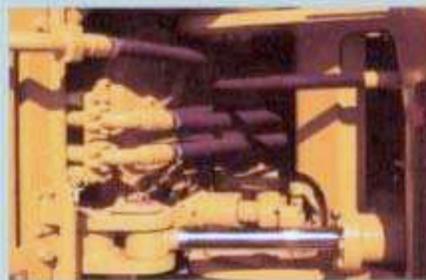

Cycle time is reduced due to fast hydraulic speeds. The Kawasaki 110ZII also has excellent dump and reach capabilities. It is an ideal match for 35-ton class haulers and can also effectively load out low profile 50-ton class haulers.

SERVICEABILITY FEATURES

To insure proper efficient servicing, the Kawasaki 110ZII offers many features. All grease fittings are located for easy access. Convenient panels and hinged hood sides make routine service checks simple. All flange fittings use SAE threads.

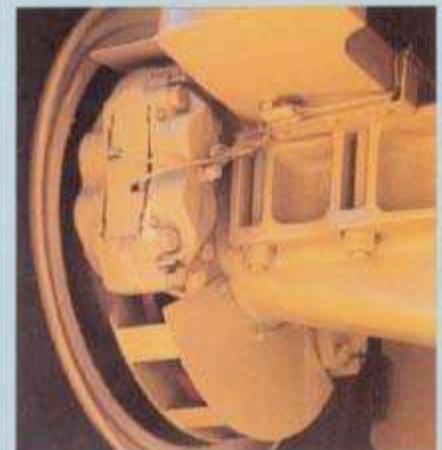

for easy, convenient replacement. Most of the hoses are used in several locations, allowing a minimal stock of hoses to support the entire machine. A tire inflator and special tool kit are standard.

SIMPLE, EFFECTIVE CALIPER DISC BRAKES

The four-wheel, long life caliper disc brakes are self-cleaning, fade resistant and easy to service. Pad wear is easily monitored through inspection covers and pad removal is done quickly and easily. The front and rear brakes are completely separate to provide added safety. The emergency brake automatically applies in case of loss of air or oil pressure.

KAWASAKI'S PDQ SYSTEM

Kawasaki understands the need for timely delivery of parts to any of its users. To provide an unsurpassed level of service in this area, Kawasaki maintains an extremely high level of parts availability and fast response from our parts distribution network and dealers.

KAWASAKI HISTORY

The dependable Kawasaki loader is manufactured by Kawasaki Heavy Industries. Kawasaki is a large industrial manufacturer of ships, aircraft, locomotives, robots, plants, hydraulic components, and motorcycles, as well as a variety of construction equipment. The first Kawasaki articulated loader was manufactured in 1962, making Kawasaki a true pioneer in the loader market. The Kawasaki loaders are sold in over 100 countries. Kawasaki is one of the largest loader manufacturers in the world.

OPERATING SPECIFICATIONS

110zII

ENGINE

Make/Model/Fuel type	Cummins/KT19-C/Diesel
Type	4 cycle, watercooled, turbocharged, direct injection
Net flywheel horsepower	383HP/2100rpm
Number of cylinders	6
Bore and stroke	φ 6.25" × 6.25" (φ 159mm × 159mm)
Total displacement	1150in ³ (18.853cm ³)
Alternator (Delco)	AC24V-1800W/75AMP
Starting motor	24V-11 kw (14.7HP)
Battery	12V-200Ah: 2 Units
Governor	All speed, mechanical type

TORQUE CONVERTER AND TRANSMISSION SPECIFICATIONS

Torque converter	three elements, single stage, 1-phase
Torque stall ratio	2.9:1
Main clutch	wet hydraulic, multi-disk type
Cooling method	forced circulation type
Transmission	full power shift, 3 forward, 3 reverse
Max Speeds:	forward: 17.4 MPH (28.0 km/HR) reverse: 18.6 MPH (30.0 km/HR)

SERVICE REFILL CAPACITY

LOCATION		gal (Lit)
Engine	Cooling water	26 (100)
Fuel tank	Diesel fuel	159 (600)
Engine (oil pan)	Engine oil	16 (59)
Front axle	Gear oil	35 (133)
Rear Axle	Gear oil	35 (133)
Gear box (steering)	Gear oil	0.4 (1.5)
Torque converter and transmission	Transmission fluid	21 (80)
Hydraulic system (including tank)	Hydraulic oil	159 (600)
Brake oil tank	Brake fluid	1.6 (6)

HYDRAULIC AND STEERING SYSTEM

Type	articulated frame steering	
Steering mechanism	hydraulic power steering unit, mechanical follow-up	
Lift (boom) cylinder	two (2) double-acting piston type: φ8-13/16" × 3'7-3/8" (φ224mm × 1101mm)	
Tilt (bucket) cylinder	two (2) double-acting piston type: φ6-7/8" × 2'3-3/8" (φ175mm × 695mm)	
Steering cylinder	two (2) double-acting piston type: φ4-6/8" × 1'6-7/8" (φ120mm × 480mm)	
Steering pump	gear type: 50GPM/2490psi @ 1800rpm (190LPM/175kg/cm ² @ 1800rpm)	
Main pump	gear type: 50GPM/2490psi @ 1800rpm (190LPM/175kg/cm ² @ 1800rpm)	
Demand (switch) oil pump	gear type: 50GPM/2490psi @ 1800rpm (190LPM/175kg/cm ² @ 1800rpm)	
Relief set pressure	Loading	2490psi (175kg/cm ²)
	Steering	2490psi (175kg/cm ²)
HYDRAULIC CYCLE TIME: *		
Lifting time (at full load)	9.1 sec.	
Lowering time (empty)	4.8 sec.	
Bucket dumping time	1.5 sec.	
TOTAL	15.4 sec.	
*Measured in accordance with SAE J732C.		

AXLE SYSTEM

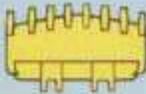

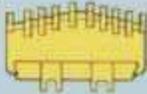

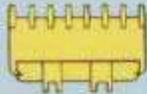

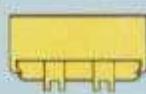

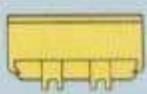

Drive system	4-wheel drive
Front and rear axle	full floating banjo type
Tires	Standard: 29.5-29-28PR (L-4) Optional: 29.5-29-28PR (L-3) 29.5-29-28PR (L-5) 35/65-33-24PR (L-4) 35/65-33-24PR (L-5)
Reduction and differential gear	Spiral bevel gear, 1 stage reduction
Final reduction gear	Outboard mounted, internal planetary gear
Oscillation	± 12° (total 24°)

BRAKE SYSTEM

Service brakes	4 wheel air over hydraulic, disk brake
Parking brake	Spring applied air released type, located in rear drive shaft
Emergency brake	same as parking, applying on failure in air or brake fluid line
