D575A-3 SUPER DOZER

FLYWHEEL HORSEPOWER
858 kW 1,150 HP @ 1800 rpm

OPERATING WEIGHT
152600 kg 336,420 lb

Photos may include optional equipment.

Courtesy of Machine.Market
When it comes to crawler dozers, bigger really is better. Bigger dozers are more efficient—they push more material per hour, and per shift, for a lower overall cost per yard. Presenting the most efficient of them all—the Komatsu D575A-3 Super Dozer. The largest, most productive dozer in the world by a factor of nearly two.

Komatsu-integrated design offers industry-leading productivity and reliability, now with additional advanced standard features. Hydraulics, power train, frame, and all other major components are engineered and manufactured by Komatsu. You get a machine whose components are designed to work together for higher production, greater reliability, and improved operator comfort.

Preventative Maintenance
• Centralized Service Station
• Enclosed Hydraulic Piping
• Modular Power Train Design
• Oil Pressure Checking Ports

Large Blade Capacity:
69 m^3 90 yd^3

The Super Dozer
The D575A-3 Super Dozer reduces operating costs ($/tons) by high dozing productivity.
• Large capacity Super Dozer blade with low dozing resistance

Automatic lockup torque converter saves fuel and increases speed and power transmitting efficiency on long pushes

858 kW 1,150 HP turbocharged, aftercooled engine provides plenty of power
Pentagonal Designed Cab includes:
- Spacious interior
- Excellent visibility
- PCCS (Palm Command Control System) lever
- Pressurized cab
- Adjustable armrests

Extra-low Machine Profile
provides excellent machine balance
and low center of gravity

ECMV (Electronic Controlled Modulation Valve) controlled
steering clutch/brakes system facilitates steering operation

Low-drive, long-track, eight roller undercarriage
ensures outstanding grading ability
and stability

Resilient Equalized Undercarriage (REU)
improves traction, component durability, and operator comfort

Komatsu’s highly productive, innovative
technology, environmentally friendly
machines built for the 21st century.
Komatsu's new ergonomically designed control system “PCCS” creates an operating environment with “complete operator control.”

Operator-machine Interface

Palm Command Electronic Controlled
Travel Control Joystick
Ergonomically designed palm command travel joystick provides the operator with a relaxed posture and superb fine control without operator fatigue. Transmission gear shifting is simply carried out with thumb.

Fully Adjustable Suspension Seat
and Travel Control Console
For improved rear visibility during return part of cycle, the operator can adjust seat 15° to the right. The transmission and steering controls move with the seat for best operator comfort. The travel control console also has adjustment fore and aft and for height, with an independently adjustable armrest. Each D575A operator can adjust control positions to his individual preference.

Fuel Control Dial
Engine revolution is controlled by an electric signal, providing ease of operation and reducing problems caused by linkage joint seizure.

Palm Command PPC Controlled
Blade Control Joystick
Blade control joystick uses the PPC (Proportional Pressure Control) valve and a palm command joystick the same as a travel control joystick. PPC control combined with the highly reliable Komatsu hydraulic system, enables superb fine control. Pitch operation is enabled by depressing switch with thumb.

Height Adjustable Blade Control Armrest
The blade control armrest is height adjustable without any tools in three stages, providing the operator with firm arm support and ideal armrest positioning.

Outline of Electronic
Control System
Electronic Control System

Smooth and Soft Operation

D575A-3 Super Dozer uses a newly designed power train electronic control system. Controller registers the amount of operator control (movements of lever and operation of switches) and machine condition signals from each sensor, and calculates to accurately control the torque converter, transmission, steering clutches and brakes for optimized machine operation. The ease of operation and productivity of the new D575A-3 SD is remarkably improved by numerous new functions.

ECMV (Electronic Controlled Modulation Valve) Controlled Transmission

Controller automatically adjusts each clutch engagement depending on travel conditions such as gear speed, revolution, and shifting pattern. This provides shockless smooth clutch engagement, improved component reliability, expansion of component life, and operator riding comfort.

ECMV (Electronic Controlled Modulation Valve) Controlled Steering Clutches/Brakes

Sensors monitor machine operating conditions, and electronically controls steering clutches and brakes depending on type of job, such as size of load during dozing, incline angle of slope or load, providing smooth and ease of operation by reducing counter-steering on downhill travel etc.

Effect of ECMV Steering Clutches/Brake Control

When dozing and turning, ECMV automatically controls stroke ratio of steering clutches and brakes depending on degree of load, enabling smooth dozing and turning.

When dozing downhill, ECMV automatically controls steering clutches and brakes depending on incline of machine or degree of load, reducing counter-steering and producing smooth dozing operation.

Preset Travel Speed Selection Function

Preset travel speed selection function is standard equipment, enabling the operator to select fore and aft travel speed among three preset patterns such as F1-R2, F2-R2, and manual shift. When F1-R2 or F2-R2 preset pattern is selected, and travel control joystick moves to forward/rearward direction, the machine travels forward/rearward with F1-R2 or F2-R2 speed automatically. This function reduces operating hours and operator’s gear shifting time during repeated round-trip operations.

Auto-shift Down Function

Controller monitors engine speed, travel gear, and travel speed. When load is applied and machine travel speed is reduced, the controller automatically shifts down to optimum gear speed to provide high fuel efficiency. This function provides comfortable operation without manual downshift and high productivity (This function can be cancelled with cancel switch).
Operator Comfort

Operator comfort is essential for safe and productive work. The D575A-3 Super Dozer provides the operator with a quiet, comfortable environment where he can concentrate on the work at hand.

Pentagonal Pressurized Cab

- The large tinted glass windows provide a panoramic view of work area.
- Air filter and a higher internal air pressure combine to prevent dust from entering the cab.

New Suspension Seat

D575A-3 Super Dozer uses a newly designed suspension seat with strengthened seams and breathable fabric. Fore and aft sliding rails and suspension spring are newly designed, increasing strength and rigidity and reducing play of joints. New seat provides excellent support and riding comfort. Fore and aft sliding amount is designed to fit all operators.

Monitor with Self-diagnostic Function

Display for User

In normal operation the monitor displays engine rpm and forward/reverse gear speed on the upper part of the display, and service meter on the lower part of the display.

Continuous Machine Monitoring System

Check-before-starting and caution items appear on the liquid crystal panel and a warning buzzer. The continuous machine condition check helps prevent the development of serious problems and allows the operator to concentrate his attention on the controls.

Abnormalities on Electronics System Display with Code

When an error occurs during operation, user code and service meter are displayed alternately. When a high importance user code is displayed, a caution lamp lights up and a warning buzzer sounds to prevent the development of serious problems.
Engine
The Komatsu SA12V170E engine delivers 858 kW 1,150 HP at 1800 rpm. The fuel-efficient Komatsu engine, together with the heavy machine weight, makes the D575A-3 Super Dozer a superior crawler dozer in dozing production. The engine is designed to surpass EPA/CARB regulations, and features direct fuel injection, a turbocharger, and an aftercooler to maximize fuel efficiency.

To minimize noise and vibration, the engine is mounted to the main frame with rubber cushions.

Automatic Torque Converter Lockup System
For greater efficiency during long pushes, the lockup mode allows the system to automatically engage the torque converter lockup clutch. Locking up the torque converter transmits all the engine power directly to the transmission, increasing ground speed, thus achieving efficiencies equal to a direct drive. The result is efficient use of engine power, less fuel consumption, and faster cycle times.

Resilient Equalized Undercarriage (REU)
The REU system provides powerful traction, component durability, and operator comfort. Outstanding traction can be achieved because the shoes always follow the contour of the ground. The X-shaped, bogie-structured resilient equalized undercarriage performs independent see-saw movements. To decrease vibration and shock, rubber shock absorbers are mounted on the X-shaped bogies. The bogies and rubber cushions provide different absorption characteristics depending on the ground surface. When the machine travels on flat ground, the REU functions as a conventional rigid undercarriage. When the machine travels on uneven ground, the REU maximizes the suspension effect.
Super Dozer Blade

The 69 m³ 90 yd³ capacity Super Dozer blade yields outstanding production with the innovative Super Dozer blade design, which is 15% more productive in level dozing.

- Blade capacity increased by extra holding volume
- Pushing larger volume of material against the same soil resistance
- Optimum machine balance for dozing

Unlike ordinary dozer blades, the Super Dozer blade has a full range of movement. Three basic positions—dig, carry, and dump—create previously unheard-of levels of efficiency. It also includes auto-dump and auto-reposition features.

Q = Original blade capacity
ΔQ = Additional holding volume
(ΔQ = 0.15 x Q)
L = Soil resistance

D575A-3 Super Dozer 69 m³ 90 yd³
Conventional U-Blade 45 m³ 59 yd³

Preventative Maintenance

Preventative maintenance is the only way to ensure long service life from your equipment. That’s why Komatsu designed the D575A-3 Super Dozer with conveniently located maintenance points to make necessary inspections and maintenance quick and easy.

Centralized Service Station

To ensure convenient maintenance, all necessary filters are arranged in a centralized service station next to right side of the cab.

Enclosed Hydraulic Piping

Hydraulic piping for the blade tilt and pitch is completely housed in the push arm ensuring protection from materials.

Modular Power Train Design

Power train components are sealed in a modular design that allows the components to be dismounted and mounted without oil spillage, making service work clean, smooth, and easy.

Oil Pressure Check Ports

Pressure check ports for power train components are centralized to promote quick and simple diagnosis.
ENGINE

Model: Komatsu SA12V170E
Type: 4-stroke, water-cooled, direct injection
Aspiration: Turbocharged, aftercooled
Number of cylinders: 12
Bore x stroke: 170 mm x 170 mm (6.69" x 6.69")
Piston displacement: 46.3 ltr (2,825 in³)
Horsepower rating @ 1800 rpm: 858 kW (1,150 HP)
Governor: All-speed, electrical

TORQFLOW TRANSMISSION

Komatsu TORQFLOW transmission consists of an air-cooled, 3-element, 1-stage, 1-phase torque converter with lockup clutch and a planetary gear, multiple-disc clutch transmission which is actuated by ECMV (Electronic Control Modulation Valve) and force-lubricated for optimum heat dissipation.

STEERING SYSTEM

PPCS lever, joystick-controlled, wet multiple-disc steering clutches are spring-loaded and hydraulically released. Wet multiple-disc, pedal/lever controlled steering brakes are spring-actuated, hydraulically released, and require no adjustment. Steering clutches and brakes are interconnected for easy, responsive steering.

UNDERCARRIAGE

Suspension: Oscillating equalizer bar and pivot shaft
Track roller frame: Box-section, high-tensile-strength steel construction
Rollers and idlers: Lubricated track rollers
Resilient equalized undercarriage
Lubricated track rollers. Unique seals prevent entry of foreign abrasives into pin to bushing clearances to provide extended service life. Track tension is easily adjusted with grease gun.

Number of shoes (each side): 49
Grouser height:
- Single grouser: 105 mm (4.1"
- Shoe width (standard): 860 mm (34"
Ground contact area: 94342 cm² (14,623 in²)
Ground pressure: 159 kPa (23.0 psi)
Number of track rollers (each side): 8
Number of carrier rollers (each side): 2

COOLANT AND LUBRICANT CAPACITY (REFILL)

Fuel tank: 2100 ltr (555 U.S. gal)
Coolant: 298 ltr (79 U.S. gal)
Engine: 195 ltr (52 U.S. gal)
Torque converter, transmission, bevel gear, and steering system: 345 ltr (91 U.S. gal)
Final drive (each side): 160 ltr (42 U.S. gal)

**OPERATING WEIGHT**

**Tractor weight**

114580 kg 252,600 lb

Including rated capacity of lubricant, coolant, full fuel tank, operator, and standard equipment.

**Operating weight**

152600 kg 336,420 lb

Including Super Dozer blade, counterweight, steel cab, ROPS, operator, standard equipment, rated capacity of lubricant, coolant, and full fuel tank.

**Ground pressure**

159 kPa 1.62 kg/cm² 23.0 psi

**HYDRAULIC SYSTEM**

**Hydraulic control unit:**

Maximum flow: 1258 ltr/min 332 U.S. gal/min

Relief valve setting: 20.6 MPa 210 kg/cm² 2,990 psi

- All-spool control valves
- Multi-chamber gear hydraulic pump

**Control valves:**

- Two control valves [Super Dozer]
  - Positions: Blade lift: Raise, hold, and lower
  - Blade tilt: Right, hold, and left
  - Blade pitch: Forward, hold, and rearward

**Hydraulic cylinders**

Double-acting, piston type

STANDARD EQUIPMENT

- Air conditioner with heater and defroster
- Alternator, 75 A/24 V
- AM/FM radio
- Auto-priming system
- Back-up alarm
- Batteries, 200 Ah/4 x 12 V
- Blower fan
- Cab pressurizer
- Decelarator pedal
- Dry-type air cleaner with dust evacuator and dust indicator
- Final drive case wear guard
- Hinged front mask
- Hinged underguard with front pull hook
- Hydraulic track adjusters
- Lighting system (including eight front and four rear lights)
- Lockup torque converter
- Muffler with rain cap
- PCPS lever, steering control
- Power lift, power pitch blade system
- ROPS
- Segmented sprockets
- Semi-automatic blade repositioner
- Shoes, 860 mm 34"
- Starting motors, 2 x 11 kW/24 V
- Steel cab with FOPS
- Suspension seat with seat belt
- TORQFLOW transmission
- Track frames, eight-track-roller
- Track roller guards (center)
- Travel control console integrated with operator seat
- Vandalism protection locks
- Warning horn
- Wet steering clutches

OPS (FOPS)*:
