EXCAVATOR

PC200-7 Series Hydraulic Excavator

774773-473307375

Productivity Features

 High Production and Low Fuel Consumption
 Production is increased with

larger output during Active mode while fuel efficiency is further improved.

Maximum Digging
 Height is 10 m 32'10", a
 benefit in jobs requiring
 a longer reach.

Easy Maintenance

- Replacement interval is extended for engine oil, engine oil filter and hydraulic filter
- Remote mounted engine oil filter and fuel drain valve for easy access
- Water separator is standard equipment
- Easier radiator cleaning
- Fuel tank capacity is increased
- SCSH bushings on work equipment extend lubricating interval from 100 hours to 500 hours (excluding bucket)

Excellent Reliability and Durability

High rigidity work equipment

Harmony with Environment

sacrificing power or machine productivity. • Economy mode improves fuel consumption

A powerful turbocharged and air-to-air aftercooled Komatsu SAA6D102E-2 provides 107 kW 143 HP. This engine meets 2001

EPA emission regulations, EPA Tier 2 emission ready without

Low emission engine

Low operating noise

- Sturdy frame structure
- Reliable Komatsu manufactured major components
- Highly reliable electronic devices

Komatsu's highly productive, innovative technology, environmentally friendly machines built for the 21st century.

LEWINISS SHOOTG.LIAILA

High Production and Low Fuel Consumption

Engine

The PC200-7 gets its exceptional power and work capacity from a Komatsu SAA6D102E-2 engine. Output is 107 kW **143 HP**, providing increased hydraulic power and improved fuel efficiency.

Hydraulics

Unique two-pump system ensures smooth compound movement of the work equipment. HydrauMind controls both pumps for efficient engine power use. This system also reduces hydraulic loss during operation.

Large Digging Height

PC200-7's maximum digging height is 10 m **32'10"**, facilitating jobs that require a longer reach, such as demolition and slope finishing.

Four Working Modes

Working Mode Selection

The PC200-7 excavator is equipped with four working modes (**A**, **E**, **L** and **B** mode). Each mode is designed to match engine speed, pump output, and system pressure with the current application. This provides the flexibility to match equipment performance to the job at hand.

Economy Mode

Economy mode is environmentally friendly. Fuel consumption is reduced 20% (compared with PC200-7 Active mode) and production is equal to the PC200-6 Heavy-duty mode.

Power Max Function

This function temporarily increases digging force by 7% for added power in tough situations.

Lifting Mode

When the Lifting mode is selected, lifting capacity is increased by 7% by raising hydraulic pressure.

Larger Digging Power Provides Increased Production

Bucket Digging Power is obtained by bucket digging force x bucket digging speed. New PC200-7 bucket digging force is increased by 10% and bucket digging speed is increased by 17%, the resulting total bucket digging power is increased 29% (bucket digging force compared with PC200-6). The digging force and speed generated result in the largest digging power and the largest production in the 20 ton **22 U.S. ton** class.

Bucket Digging Force*	: SAE 138 kN	14100 kg	31,080 lb
	ISO 149 kN	15200 kg	33,510 lb
Arm Crowd Force*:	SAE 101 kN	10300 kg	22 710 lb

Arm Crowd Force*: SAE 101 kN 10300 kg **22,710 lb** ISO 108 kN 11000 kg **24,250 lb**

*Measured with Power Max function, 2925 mm 9'7" arm

TILE INTO RETAINED TO SEE THE SERVICE SERVICES

PC200-7 cab interior is spacious and provides a comfortable working environment...

Large Comfortable Cab

Comfortable Cab

New PC200-7's cab volume is increased by 14%, offering an exceptionally comfortable operating environment. The large cab permits full flat reclining of the seat back.

Pressurized Cab

The air conditioner, air filter and a higher internal air pressure (6.0 mm Aq **0.2"** Aq) prevent external dust from entering the cab.

Low Noise Design

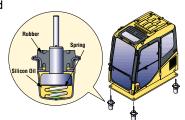

Noise level is remarkably reduced, not only engine noise but also noise when swinging and hydraulic relief.

Low Vibration with Cab Damper Mounting

PC200-7 uses new, improved multi-layer viscous mount system that incorporates longer stroke and the addition of a spring. The new cab damper mounting combined with strengthened left and right side decks aids vibration reduction at the operator's seat.

Vibration at floor is reduced from 120 dB (VL) to 115 dB (VL).

dB (VL) is index for expressing size of vibration.
