AATVs feel at home on any rough terrain which they conquer despite any obstacles along the way.

Diverse and exciting world of motor vehicles is developing rapidly drawing attention of the most sophisticated public.

Design, steering, comfort and ergonomics – that is what ultimately defines the character of any motor vehicle.

We leverage our experience and advanced technologies to offer you a Premium edition of amphibious ATVs – an absolutely unique and unprecedented family of vehicles unmatched in the off–road segment.

Each machine in the lineup is tailor–made offering the customer safety and comfort. A wide range of options and attachments considerably expands their area of application. Ergonomic driver compartment with engaging interior design can be made of the most advanced materials. Climate control system and additional noise insulation create comfortable environment inside the vehicle. Cold storage for food is available. The customers may choose any multimedia system with a touch–screen display. Rear view camera and LED running lights are indispensable when driving at night.

Dynamic driving without limits will expand your geography and making any hard–to–reach and fascinating corners of the world real. We offer you to go on a marvelous journey or set off on a major expedition no matter how difficult the road may be.

# GAZ – 34039 IRBIS

Premium edition

GAZ–34039 IRBIS is a versatile vehicle built for the toughest road conditions and climates to carry people and cargo across country even in the Far North, Siberia and Far East regions. The vehicles are designed for outdoor storage and operation in temperatures ranging from –50°C to +50°C in various road and climatic conditions and on any surface with a low load-bearing capacity – on snow, in sand, swamps and marshes – as well as for crossing water. Waterborne propulsion is provided by the tracks.

## Overall dimensions

Parameter	Units	GAZ-34039 IRBIS	
		Passenger	Cargo-passenger
Length	mm	6280	
Width	mm	2540	
Height – with / without pilot light	mm	2890 / 2620

Localized lighting in the passenger compartment

Push-button start technology – Engine Start-Stop System

Powertrain. High-performance turbocharged diesel engine (122 hp)

Multimedia system with a touch-screen display, navigation, CD/MP3/DVD

# GAZ-3409 BOBR

GAZ-3409 BOBR is a versatile amphibious all-terrain tracked vehicle built for the toughest road conditions and climates to carry people and cargo across country even in the Far North, Siberia and Far East regions. Easy and comfortable steering, sophisticated design, excellent off-road performance, maneuverability and reliability, weather resistance, optimal balance between performance and cost of ownership, outstanding comfort and convenience.

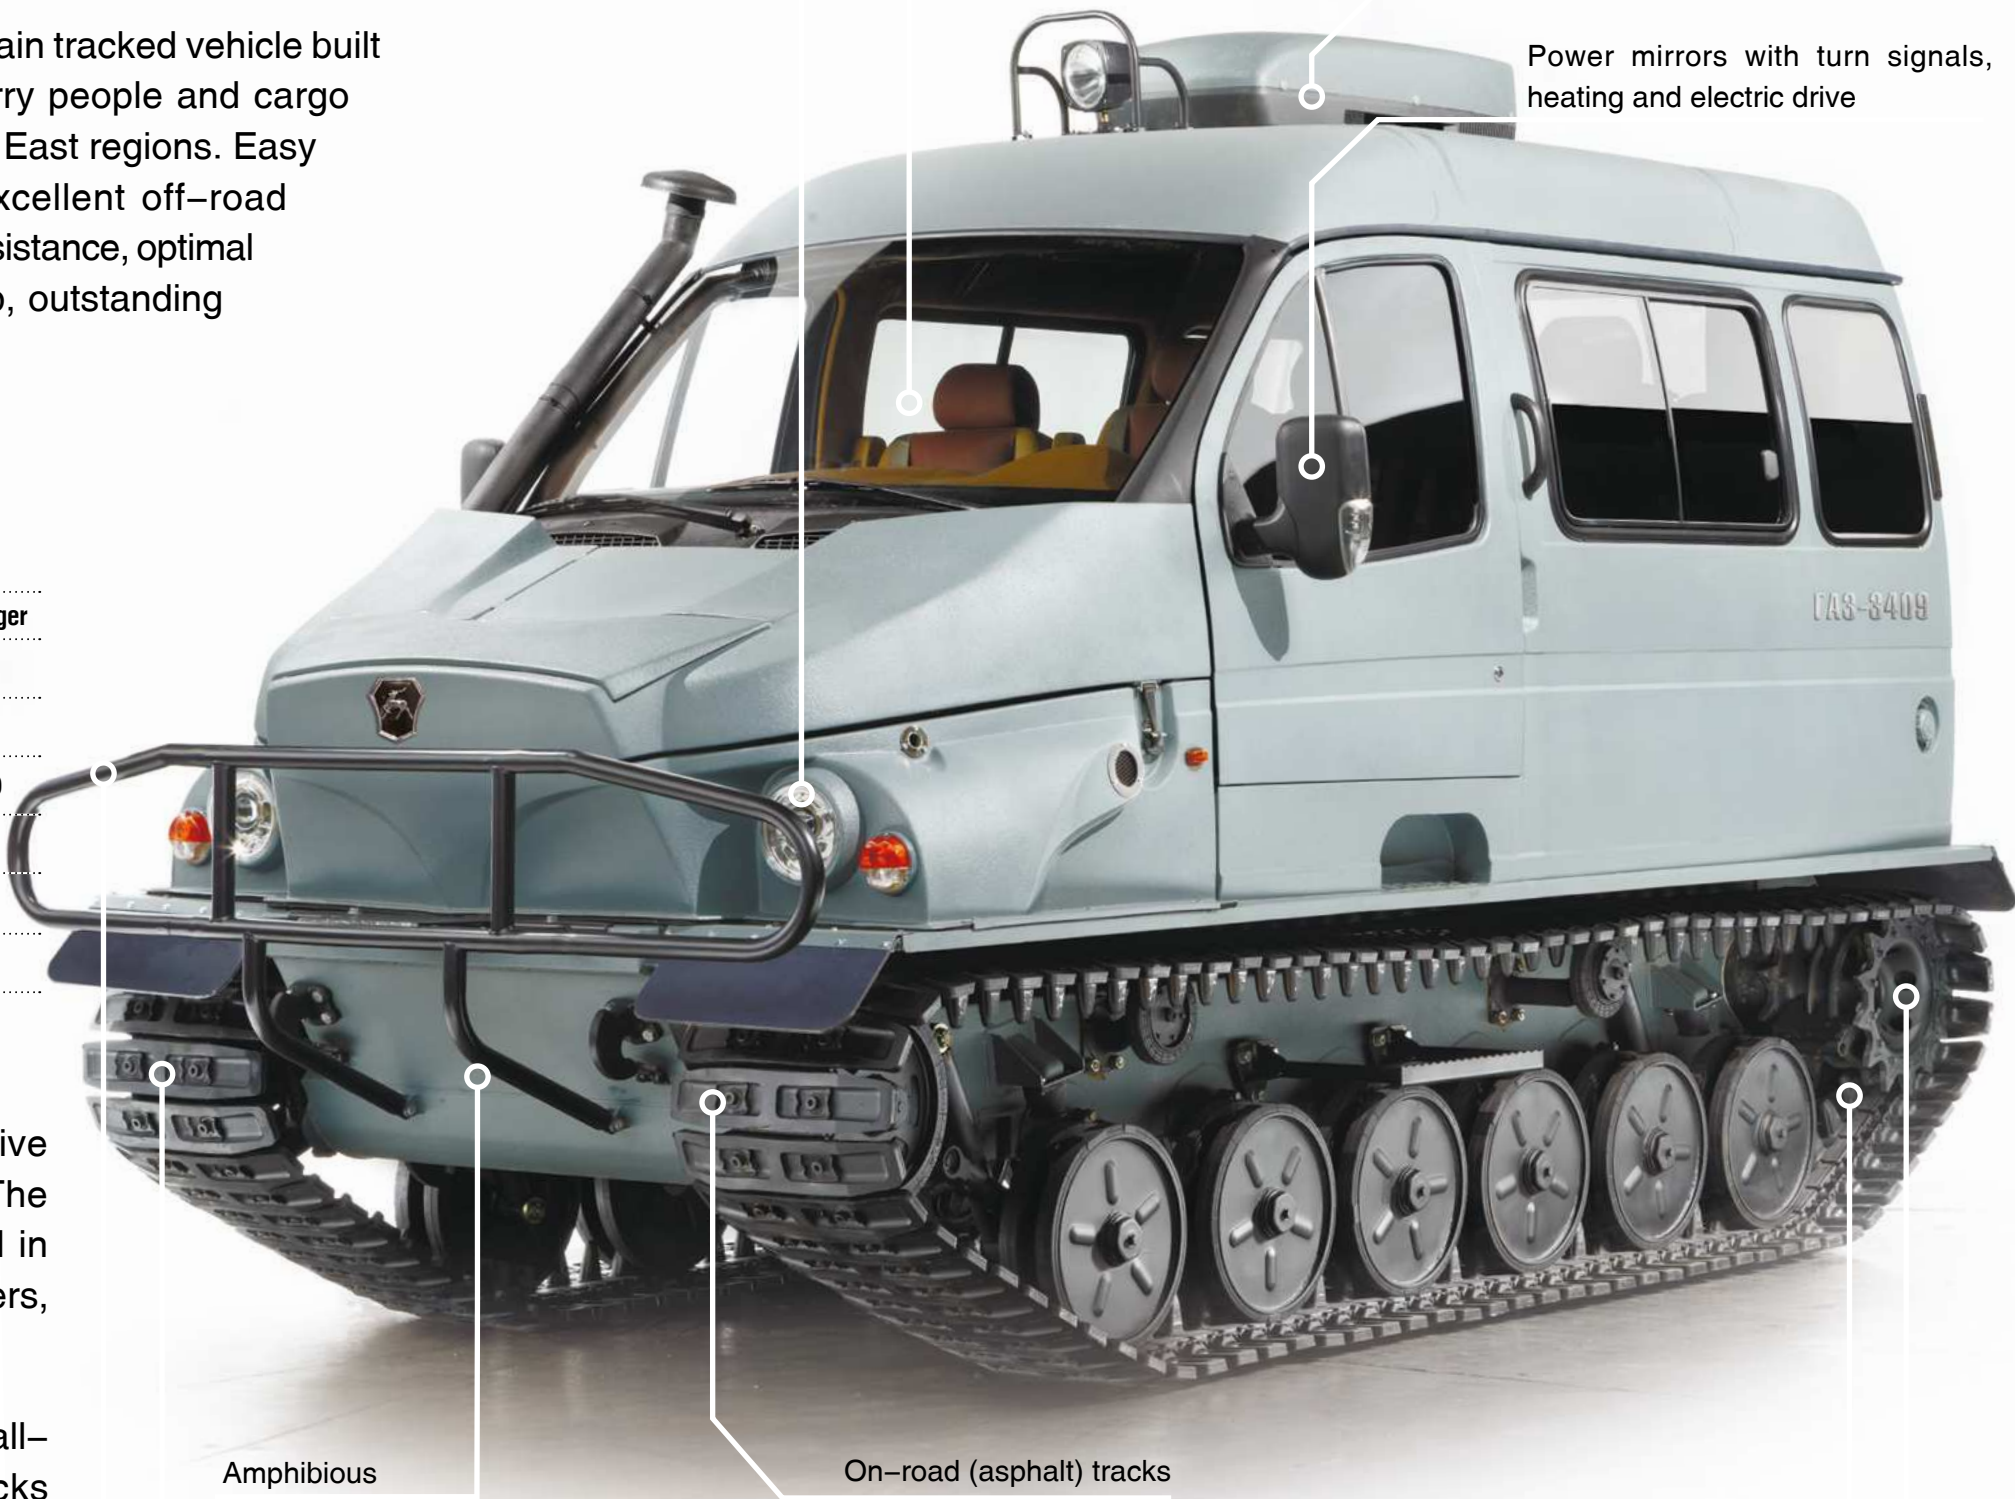

## Overall dimensions

Parameter	Units	GAZ-3409 BOBR	
		Passenger	Cargo-passenger
Length	mm	4625	
Width – with mirrors / body	mm	2380 / 2020	
Height – with / without pilot light	mm	2770 / 2500	2640 / 2360
Base	mm	2500	
Track gauge	mm	1520	
Road clearance	mm	430	

The track assembly transforms rotation of the drive wheels into the forward movement of the vehicle. The assembly consists of two guiding wheels positioned in the front, two drive wheels in the rear, four support rollers, twelve road wheels and two tracks.

The vehicles feature small-link rubber-jointed tracks with rubber treads, track width extensions and pin gearing.

Bi-xenon lights

Excellent visibility

Air-conditioning

Power mirrors with turn signals, heating and electric drive

Amphibious

On-road (asphalt) tracks

High maneuverability

Snow removers for cleaning the inner surface of drive wheels

Bullbar protects the front of the vehicle from mechanical damage

Drive wheels transfer torque from transmission to tracks
