XT7 SERIES
SKID LOADER

Engine model: Perkins
Rated power (kW/r/min): 35.7
Dumping clearance (mm): 2270
Rated load (kg): 720
Operating weight (kg): 2835
XT740/XT750/XT760 Skid Steer Loader is the series loader, researched and developed by XCMG with the latest design standard. It is a new kind of product characterized by high efficiency, beauty, safety and reliability. With the technology of wheel mechanism, all-wheel drive and skid-steering, it can easily and quickly replace and hook a variety of devices to adapt to the different working environments and operational items. It is also a kind of small multi-functional engineering machine, developed on the basis of product technology of its kind, superior to the products of its kind in performance with such modern design methods as virtual prototyping and finite element analysis, etc. It is suitable for narrow places, uneven grounds and occasions of frequently-changing operating items. It can also be used as ancillary equipment for large-scale construction machinery. It is extensively used for purposes of roadway maintenance, pipeline-laying, cable-laying, landscaping, snow-sweeping, cargo-transportation, excavation & fragmentation, etc.

### General Features

Chassis integrated with hydraulic tank and fuel tank provides space saving and machine more robust.

The use of world-famous brand engine and Rexroth hydraulic parts ensures the machine can excel in all kinds of operations.

Automatic leveling system, while boom moves up, bucket will stay parallel.

Proportional pilot handle is easy to operate. Operators can work quickly and comfortably with little effort.

The universal quick change device can realize quick and convenient replacement of all kinds of attachments. The quick-connect couplings of pipeline are above standard. The majority of attachments from other manufacturers can be used on the machine.

Spacious cab with all instrument panels easily observable in front.

All switches can be easily accessed. Safe armrest can prevent operators from driving errors when leaving the seat accidentally, thereby ensuring the safe operation.

Cab can be rolled over with a wide-angle. Accelerator has two models: manual control and pedal accelerating control, which makes operation easy. More attachments can be replaced on the machine.

For other tools not listed in this document:

- Miling machine
- Arm-type cleaner
- Bevel cleaner
- Four-in-one bucket
- Driller
- Digger
- Excavator
- Vibratory Compactor
- PD wheel compactor
- Industrial grab bucket
- Grasping grass machine
- Snow Plow
- Snowblower
- Drums clip
- Spreader
- Fork
- De-icer
- Soft clamps
- Concrete claw
- Breaking hammer
- Ditcher
- Cement mixer
- Hook
- Tree spade
